

## Testimonials:

"I am so grateful for New Hope. The staff are amazing. Thank you for saving my life. MMT saved my life after years of struggling with opiate addiction in and out of treatment facilities. Hands down the best decision I've made in a long time."

"You are treated like you matter"

"I love this clinic. The staff is great. They are quick and convenient. Truly seem to care about getting you better. I know my life has changed so much since I've started coming here. All for the better. Thank you New Hope!"

"Saved, changed, and bettered my life. Five years sober because I was lucky enough to find this place"

## Philosophy

It is our philosophy that the responsibility for personal growth and changes lives with the patient. The relationship between patient and staff is a mutual one; we share the following program objectives and responsibilities:

1. To promote a life free of illicit drug use and addiction
2. To develop self awareness in patients
3. To assist patients in developing alternative behavior to addiction and drug abuse and its subsequent negative effects
4. To assist in the development of positive relationships with family and significant others
5. To assist patients in their rehabilitation to a productive life-style

As a patient of NHBHC's program patients will be afforded the opportunity to participate fully in complete range of services possible, use of existing community resources will be sought to provide for supportive needs. NHBHC will take pride and priority in offering and providing the following services:

1. Out-patient treatment services for opioid addiction
2. Medication monitoring/management
3. Medication Adjustments
4. Out-patient Medically Supervised Withdrawal (MSW)/tapering services
5. Individual and Group Counseling
6. Opioid agonist treatment for women, with priority given to pregnant women

## Admission Criteria

- Individuals seeking treatment must participate in an initial screening prior to admittance to ensure that individual meets the eligibility requirements established by NHBHC, state, and federal guidelines regarding opiate replacement therapy.
- No individual under the age of 18 will be admitted.
- NHBHC does not provide treatment to be used primarily for chronic pain/pain management.

## Key To Hope Foundation

Founded in 2022 to offer the substance use disorder (SUD) population with access to needed services that are otherwise unavailable. To help bring awareness and education to the community and the population served.
